

MemeContent

Free Ad Generator
for **Solana Coins**

Instantly generate **ready-to-post ad videos** for TikTok, X, Instagram and YouTube Shorts Powered by Solana. No Plans. No Paywalls.

SECTION 1:

Project

What is MemeContent?

MemeContent is a **free open-source platform** and API for generating viral meme-style videos tailored for Solana projects — from memecoins to DeFi, NFTs, and beyond.

In just 30 seconds, any project can launch 15–100+ creative ad videos using our templates — with logos, slogans, and coin names auto-integrated.

Why Solana?

Solana is the home of meme coin momentum. The most viral and fast-growing memecoins of 2024–2025 were launched on Solana — from \$WIF to \$POPCAT to \$BONK.

MemeContent is built for memecoins — and Solana has the best infrastructure to support high-volume viral launches with cheap, fast transactions and an active meme-driven community.

How MemeContent helps grow the Solana ecosystem:

Supercharges Solana coin visibility

Thousands of ad creatives will be published daily across TikTok, YouTube, Twitter, Instagram — bringing millions of eyeballs to Solana-based tokens.

Strengthens the Solana brand through memes

Viral content makes people talk. MemeContent empowers every Solana memecoin project — even those without marketing skills — to compete and shine globally.

Brings new users to the Solana ecosystem

More exposure = more interest = more wallets, holders, creators and Solana believers.

Free access for all projects: Metaverse, Memecoins, DEFI, DEX

MemeContent is free to use platform. All generated videos are watermark-free and aimed at empowering Solana-based token teams

Suggested extra point:

Market validation:

over 300000+ meme tokens launched monthly; creators need fast content to go viral

Tech stack ready:

FFmpeg + Node.js render engine, React UI, Docker backend — MVP in progress.

Focused niche:

Not generic promo tool — we're 100% targeted at **viral content**.

Future expansion:

MemeContent → DegenHub (Web3 marketplace for creators, launchers & holders).

Viral Moonshot Vision

At MemeContent, we don't just aim for regular growth — we aim to go interstellar.

Our ultimate goal is to create viral meme ad creatives so powerful that:

- Elon Musk,
- CZ (Changpeng Zhao),
- and even Donald Trump himself can't resist reposting them on X.

We will develop special ultra-viral video templates that are tailored to catch the attention of top influencers, crypto whales, and meme culture icons.

If even one of them picks up the content — that would bring tens of millions of views, thousands of new users, and massive global visibility for the Solana ecosystem.

Solana-Exclusive Commitment

MemeContent is being built exclusively for the Solana ecosystem.

We believe Solana is the best blockchain for viral memecoins — thanks to its speed, affordability, vibrant meme culture, and growing community.

We will not support Ethereum, BNB, or other chains — our templates, branding, and campaigns will be 100% Solana-focused.

The Problem We Solve:

Solana is currently the go-to chain for memecoins. However, most of them die out within 3–5 days due to lack of marketing, creative assets, and visual storytelling.

This not only hurts investor trust but also damages the reputation of the Solana ecosystem by making memecoins look short-lived and low-effort.

How MemeContent Solves This:

MemeContent provides high-quality, automated meme-style video creatives for memecoins.

Even the smallest projects can look professional, grab attention, create emotional resonance, and extend their lifecycle from a few days to weeks or more.

The result:

- ✓ Memecoins get tools to grow and stand out
- ✓ Users see more trust and consistency
- ✓ Solana strengthens its image as not just a hype hub — but a place for longer-living, community-driven meme projects

We are fully committed to Solana as our only supported chain.

MemeContent will serve Solana-native tokens exclusively.

SECTION 2:

Funding

Why we're applying for a grant:

To fully realize MemeContent and support 300000s of Solana meme coin creators, we're applying for a grant to:

- ✓ scale infrastructure (rendering, hosting, motion graphics designer, workers),
- ✓ complete frontend/backend dev,
- ✓ scale infrastructure (rendering, hosting, motion graphics designer, workers),
- ✓ and launch the first public version on memecontent.com

To grow awareness and engagement within the Solana community, part of the grant will be used to launch:

Social Media Campaigns

Paid promo across TikTok, X (Twitter), Instagram and YouTube Shorts, focused on:

- Solana-powered memes
- MemeContent video showcases
- Educating new holders and creators

Motion Design Battles

Monthly competitions among motion designers to create viral meme ads for Solana meme tokens. Winners get prizes, exposure, and their templates featured inside MemeContent.

Crypto Media Push

We will actively pitch the project to crypto influencers and publications, increasing visibility for both MemeContent and Solana as the leading memecoin chain.

Want to go viral with Solana?

That's exactly what this grant will help us do.

Solana-Exclusive Commitment

MemeContent is being built exclusively for the Solana ecosystem.
